

Technology Overview

Shoptiq literally made a name for itself by blending technology with shopping - and just the right amount of boutique. It's this magic mix that delights clients - and their accountants.

Shoptiq's core software platform is based on the premise that clients shouldn't have to replace their current day-to-day software to open a cutting-edge, integrated Web storefront.

Products

ShopLite - Feature-rich, scalable storefront with powerful standard features, such as real-time, web-based administration. Its interface can be quickly customized and can carry any type of design, layout or animation. Built to integrate with common retail management software.

ShopSite - Catalog software for clients who do not utilize e-commerce.

ShopBiz - Enterprise storefront software to support multiple catalogs.

Services

Software Integration - Shoptiq's team can integrate your online storefront with almost any point of sale, accounting or CRM software to streamline your online sales process.

E-Commerce - Payment gateway integration to ensure smooth selling.

Hosting & Infrastructure - Shoptiq's secure datacenter delivers unprecedented reliability for hosting, e-mail and co-location.

Website and Interface Design - Full-service design and consultation to deliver the perfect shopper experience.
